METRIC

FLANGED FULL BORE BALL VALVES

ANSI CLASS 150 & 300

73P/74P SERIES

The **73P/74P** Series are **HABONIM**'s line of flanged full bore ball valves in ANSI class 150 and ANSI class 300. Ideal for conditions which require maximum flow capacity with minimum pressure drop, reducing risk of clogging with solids or slurries, HABONIM's full bore valves offer tight shutoff, long service life and high durability with exceptional performance in many service applications under the most severe working conditions.

Technical Summary

	_
Size Range:	½"- 6" (DN15 - DN150)
Flange Connection:	73P Series - ANSI class 150
	74P Series - ANSI class 300
Application:	Chemical, Petrochemical, Oil and Gas production,
	Refining, Energy, Pulp & Paper and others
Service:	Steam, Chemicals, LP-Gas, Thermal Fluid,
	Chlorine, Ammonia, Sour Gas
Materials:	Carbon Steel, Stainless Steel, Hastelloy-C22,
	Hastelloy-C276, 254SMO, Alloy-20, Monel, Duplex, Inconel
Certifications:	Firesafe to API 607 5th Edt., ISO 10497,
	API 6FA Lloyds Type Approved to ISO 17292 & API 6D,
	PED 97/23/EC
Operation:	Hand or Gear operated, Pneumatic, or Electric Actuated

Construction

Valve sizes ½" to 1" are one piece design. Valve sizes 1½" to 6" are split body design. All valves have a top mounting flange conforming to ISO 5211 for direct mounting of actuators, limit switches, fugitive emission bonnets or extended handles.

Seats

Flexible seat design provides tight shutoff at high and low pressures, reduced wear and valve torque. A wide range of seat materials are available. Standard seat materials are Virgin PTFE, glass filled PTFE or carbon-filled PTFE. For other seat materials, please refer to Bulletin T-624, or consult with Habonim.

Stem

The valve stem assemblies have blowout proof stems with live loaded disc springs to compensate for pressure and temperature surges and wear.

Ball

A highly polished solid ball with a pressure relief hole in the stem slot to equalise the pressure in the body cavity ensures tight shutoff and long service life.

Body and Trim Materials

The standard valve body materials are 316 Stainless Steel and Carbon Steel grades WCB and LCB. Standard trim material for ball and stem is 316 Stainless Steel. Trim materials such as Monel, Hastelloy-C22, Alloy-20, Duplex and others are available for specific applications.

Antistatic

The valve stem has a built in antistatic device which ensures continuous contact of stem-to-ball and stem-to-body.

Valve's Refinement

Carbon Steel valves are phosphated and oil dipped. Stainless Steel valves are natural finish.

Interchangeability

Valve ball, stem, seats and seals are interchangeable with the Habonim **47P/46 Series** three piece ball valves.

Fire Safe Valves

Fire Safe valves are designed and tested to the requirements of API 607 5th Edition and to ISO 10497 specifications. Valves for fire safe application are identified by the prefix "**AF**". Fire Safe certificates for valves should be requested if required.

Secondary sealing

All fire safe valves are fitted with flexible graphite body seals and graphite stem seals.

The valves contain soft seat rings. In the event of fire, a secondary metalic machined ring comes in contact with the ball and prevents leakage through the valve port. The stem incorporates a machined ring shaped surface which will prevent leakage, once the thrust seal has been burnt off.

Special Service

Valves prepared for special services such as Dry Chlorine, Oxygen, Hydrogen Peroxide, Ammonia, Vacuum, Steam, Thermal fluids and low temperature service are in accordance with the relevant standards.

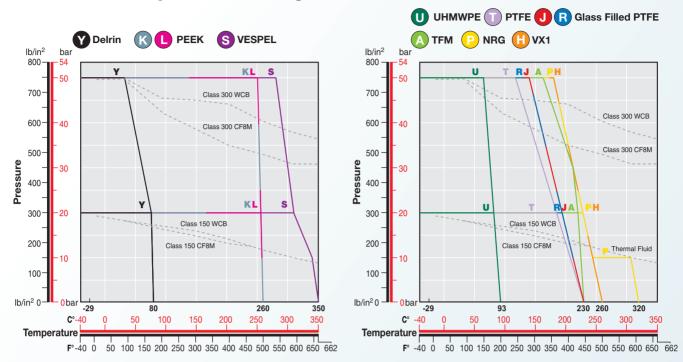

Other design applications available include Control valves with V-Ported seats and Double - Block & Bleed valves. Diverter valves and Steam Jacketed valves are optional up to 2" only. Sour gas service valves are to NACE MR-01-75. Ask for the relevant bulletins for all these applications.

Other available accessories:

Stem extensions for valves.
Fugitive emission kits for hazardous fluids.
Locking devices for securing valve postion.
Manual gear operators for operating large valves.
Declutchable gear operators for actuated valves.
Spring return handle (Dead man lever) for dependable automatic closing or opening of valves.
Limit switches for on-off indication.

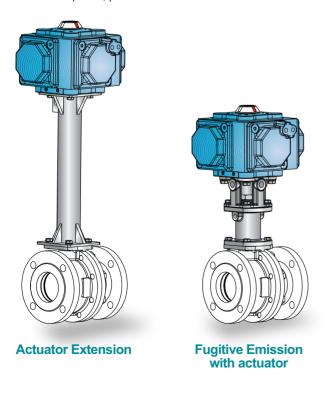

Pressure / Temperature Rating (Seat Material)

The pressure/ temperature rating is determined by the valve flanges and by the seat rating. Temperature ranges from -40°C to 350°C. Valves fitted with PEEK, DELRIN & VESPEL seats are assembled with PEEK, NYLATRON, VESPEL thrust seal accordingly and SS 17-4PH stem.

Valve Options

The HABONIM distinctive ability to engineer solutions for special applications has resulted in many designs. Some of the various valve designs and accessories that HABONIM have available with the 73P/74P series are shown below. For more information and other options, please consult with Habonim.

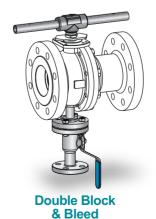

Valve	Cv Va	alues	Limiting Stem Input Torque*					
Size	Flow Coefficients			S/S naterial	17-4PH Stem material

6"	5,400	4,660	1,570	13,900	7,500	66,375		

Cv - Flow in US GPM at 1 psi pressure drop.

Kv - Flow in m3/hr at 1 bar pressure drop.

Valve flow rates are determined in full open position with water at 15°C (60°F).

* Limiting Stem torque figures are based on random laboratory tests. These are not to be confused with valve operating torque.

73P/74P Series Automated Valve Dimensions

Actuation

Where automation is required, the 73P/74P series ball valves are available with Habonim's unique 4-Piston pneumatic Compact actuator. The Compact actuator is available in 8 sizes, spring return or double acting. All the valve mounting flanges are according to ISO 5211 and are suitable for accommodating any quarter turn actuator (pneumatic or electric) for valve automatization. Valves can be operated for on-off or throttling application. The actuators have a NAMUR air connection interface for attaching solenoids. Limit switches and positioners can be mounted on the actuator top face according to VDI / VDE 3845. For information, please refer to Bulletin B360.

Actuator Sizing

Valve sizing tables of the Compact actuators on Habonim valves are available on request.

The sizing tables are based on valve size, differential pressure, valve seat types, working temperature, flowing media and frequency of operation.

The valve torque figures are calculated from tests using water at room temperature at different pressure drops for each seat material and actuator air pressure.

Please consult with HABONIM for more details.

Actuator Sizing Table

The following sizing table is for Class 150 and 300 valves with PTFE seats at ambient temperatures and 10 bar pressure drop and is for reference only.

Valve	Doub	ole Acting (DA)	Spring Return (SR)			
Size	60 psi	80 psi	100 psi	60 psi	80 psi	100 psi

Mounting Actuators or Gear Operators

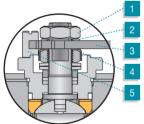

When preparing a valve for actuation, make sure to follow the instructions below.

Stem arrangement for actuated valves

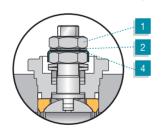

Valve sizes ½" to 2".

Release the wrench nut 1 and serrated washer 2, remove the wrench 3 and refasten the wrench nut on the tab washer 4. Remove the stop pin 5. Valve sizes 1/2" and 2" do not require the wrench nut 1.

Manual Valve stem assembly

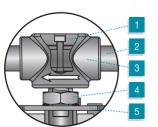

Actuated Valve stem assembly

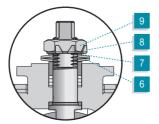

Valve sizes 3" to 6".

Release the wrench bolt 1 and remove the wrench handle 2 wrench head 3, gland nut 4 and stop plate 5. Assemble the two disc springs 6 stem location ring 7 tab washer 8 and refasten the non-slotted gland nut. 9

Manual Valve stem assembly

Actuated Valve stem assembly

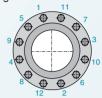

Valve Installation

Habonim flanged valves are delivered in the open position and with flange protection covers. Flanged valves are installed directly into the pipe line. When installing the valves in-line, follow the bolt tightening patterns shown below, using the recommended torque figures for safe operation. For more information, please refer to the Installation, Operation and Maintenance manual of the Habonim Flanged valves.

Locking Device

LLP (Locked in Last Position)

The Habonim spring loaded locking device (LD) is ideal for applications where it is critical to keep the valve position without the risk of accidental operation.

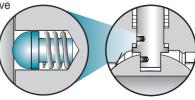

The locking device fits easily to the valve stem by simply removing the stem nut and threading the lock stem above the handle. The LD can lock the valve in the closed or open position. The LD can be fitted to the valve in-line. Available in sizes ½" to 2".

Antistatic Device

The antistatic device discharges static electricity buildup on the ball, conforming to BS 5351 for continuous electrical contact between ball/stem and stem/body. The contact is made by a spring loaded stainless steel element inserted in

the stem or a conductive PTFE stem seal. Valve sizes up to 2" feature a stem/body contact, while larger size valves have also a ball/stem contact.

How to order

When placing an order for HABONIM valves, please provide as many details possible on the application such as:

Media, Temperature, Pressure, Pipe line size and type of connection.

Example: 20 AF73P - 446MTG / 150

Size 2" (20), Antistatic (A), Firesafe (F), Full Bore ANSI 150 (73P), C. St Body & End Cap (44), S. St 316 Ball, 17- 4PH Stem (M), PTFE Seats (T), Graphite Body Seal (G), ANSI 150 RF Flange (150).

Quality Assurance

As an ISO 9001- 2008 certified company, Habonim operates according to internal manufacturing specifications that are written for each application and for specific customers. From the design stages to final inspection of assembled valves, Habonim controls its procedures for the integrity of the parts, their manufacturing process, storing and preservation and final assembly, to keep the highest standards of perfection of the product. All valves are 100% leak tested before packaging. Each valve is tagged for traceability and material certification can be provided on request.
